

Dr. Nguyen Nhu Sang (Institute for Environment Resources, VNU-HCMC, Vietnam) has been selected as the winner of the 2011 Young Asian Biotechnologist Prize in recognition of his outstanding accomplishments in the field of biotechnology. Award Ceremony will be held on Monday, September 26, 2011 during the 63rd SBJ Annual Meeting in Tokyo, Japan. Dr. Nguyen Nhu Sang will deliver the Young Asian Biotechnologist Prize Lecture after the ceremony.

### **Young Asian Biotechnologist Prize Lecture**

- **Title:** "Effects of intermittent and continuous aeration on accelerative stabilization and microbial population dynamics in landfill bioreactors "
- **Lecture Time:** 11:35 am – 11:55 am, September 26, 2011
- **Place:** Tokyo University of Agriculture and Technology, Koganei Campus  
Room S1 (Lecture Hall Building 2F, L0026) ⇒ [Venue Map](#)

### **Dr. Nguyen Nhu Sang**

Dr. Nguyen Nhu Sang is a lecturer of Institute for Environment and Resources (IER), Vietnam National University – Ho Chi Minh City. He has taught at IER and at several universities as a visiting lecturer. His research and teaching interests include waste and wastewater engineering, accelerated decomposition of solid waste in landfills and environmental management.

He has published extensively in international referred journals for these subjects. In addition to his academic activities, he has served and worked on both local and international environmental projects. He has also been a consultant to large Vietnamese and multinational firms related to application of biological and chemical processes for waste and wastewater treatment.
